VACANCY: DRAUGHTSMAN / ESTIMATOR

We are seeking a detail-oriented and technically capable Draughtsman / Estimator to support our drawing, estimating, and manufacturing processes. The successful candidate will prepare accurate technical drawings, contribute to cost-effective estimating, and work closely with production and project teams to support efficient project execution.

Key Responsibilities

- Prepare accurate technical drawings in line with project and client requirements.
- Review specifications and support estimating by identifying material, labour, and production requirements.
- Maintain drawing revisions, document control, and accurate technical records.
- Collaborate with production, suppliers, and project teams to clarify scope and resolve technical queries.
- Contribute to efficient manufacturing by producing practical, workshop-friendly drawings and estimates.

Key Competencies

- **Problem-Solving Skills** – Develops practical solutions that improve manufacturability and identifies cost-saving opportunities.
- **Organisational skills** – Manages drawing revisions and document control efficiently and maintains accurate records of issued drawings and updates.
- **Understanding of industry standards** – Ensures drawings comply with client and project specifications. Understands steel grades, sections, and plate work processes.
- **Practical manufacturing mindset** – Understands how drawings affect cutting, fabrication time, material utilisation, and production costs. Produces drawings that support efficient workshop operations.
- **Time Management** – Prioritises tasks effectively according to urgency and deadlines.
- **Mathematical ability** – Calculates dimensions, angles, radii, and material requirements accurately. Understands geometry relevant to plate development and fabrication.
- **Attention to detail** – Produces accurate drawings with correct dimensions, tolerances and specifications.
- **Integrity** – Demonstrates professionalism and accountability.
- **Communication skills** – Communicates effectively with clients, suppliers, and project teams. Clarifies drawing and scope requirements, responds to technical queries, and presents estimates clearly and professionally.

Experience and Qualifications

- Grade 12 certification
- Tertiary Draughting qualification
- Minimum 2–3 years' drawing experience
- Software proficiency
 - Inventor/Solidworks/Advance Steel
 - Windows
 - MS Office (Word & Excel)
- Own transportation will be an advantage
- Closing date – 13/06/2026

How to apply: Please send your CV and certificates to hr@twprofile.co.za, only shortlisted candidates will be contacted. Subject reference “**Draughtsman/Estimator**”
